LEFFLER PAD – PLACEMENT RATIONALE

The Leffler Pad location is in the E/2NE of Section 21, Township 6 North, Range 66 West, 6th P.M., Weld County, Colorado. The rationale for choosing this location was based on the following:

1. Donn Leffler (“Landowner”) requested this location because he wants his minerals underlying the NE/4 and the E/2NW developed, and because it provides the least interference with his current farming operations.
2. The geology supports an east-west orientation.
3. The nearest occupied Building Unit is located greater than 1500’ away from the edge of disturbance. The Building Unit that is located on the property near the pad location is not occupied and is owned by Landowner. Said Building Unit is still located 855’ from nearest wellhead.

If you have any questions or would like to discuss in further detail, please don’t hesitate to contact me.

Thanks,

Philip Hancock
