<u>No</u>	<u>BMP/COA Type</u>	<u>Description</u>
1	Drilling/Completion Operations	One of the first wells drilled on the pad will be logged with open-hole Resistivity Log and Gamma Ray Log from TD into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.

Engineer	Offset water well check: COGCC evaluated offset water wells within one mile of this proposed well's surface hole location. This information was used in addition to locally-available geophysical logs and hydrogeologic information to evaluate the adequacy of the operator's proposed surface casing setting depth. The deepest water well within one mile is 135 feet. There are no offset wells within 1,500 feet. Changed casing/liner top to 0' with operator concurrence.	8/10/2015 10:05:14 AM
Permit	Spacing order does not create a unit. Removed Unit Acreage, Configuration, and distance to unit boundary as per opr. Corrected distance to lease line from 944' to 721' as per opr. Corrected Csg/Liner Top from 800 to 0 as per opr. Ready to pass pending public comment 8/20/15.	3/5/2015 2:27:06 PM
