Good Morning,

We had a State Reportable Release at the location listed below. While removing a partially buried produced water vessel, shallow groundwater was encountered. A sample of the shallow groundwater was collected on September 23, 2015. Laboratory analytical results received on September 24, 2015 indicate that shallow groundwater exceeded CGWQS standards. Excavation/remediation activities are in progress. More information will be provided in a forthcoming Form 19 Initial Release Report. Please let me know if you have any questions. Thank you,

HSR-Ferme Farms-63N67W/14NENE

Location ID: 330941
