Please keep and submit all haul tickets upon request for closure.

Also, I see a pit registered on that location but no active pit. Do you have any closure information for the Pit? Diversified included this pit in the Form 10, change of operator.

Emily,

See attached drawing with capacitys as requested.

The well continues to be shut in, no power to the panel and the tank has been completely emptied.

Our spill path is monitored every day by the field hand for any last bits of soiled dirt, which if any is discovered will be taken to disposal facility.

Please give me a call if you need anything further.

Regards,

Jason Haack
