<krodell@upstreampm.com>

Barbara & Kim,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

1) In the Construction section you have indicated the date planned to commence construction is 9/1/15. This Form 2A cannot be final approved until after the Public Comment period ends on 10/6/15. Therefore, please provide me with a revised date planned to commence construction.

2) The NRCS Map Unit Description attachment was not included on this Form 2A. This is a required attachment. Please send me the NRCS Soil description for the 4-Ascalon fine sandy loam, 0-6 percent slopes and I will add it to the Form 2A.

Please respond to this correspondence by October 28, 2015. If you have any questions, please contact me. Thank you.

Doug,

Please see my responses.

1) Date of Construction: November 2, 2015

2) NRCS Map Unit Description and Plant composition is attached. Also attached are the Reference Area Map and Reference Area Pictures.

Please let me know if you need more or have any further questions.

Thank you.

Kim Rodell

Kim,

The Land Use on the 2A is marked as Dry land (Crop Land) Since you are also sending Reference Area Map & Pics, do you wish to change the Land Use? I kinda wondered about that as the Location Pictures don't quite look like Dry land farming to me and the Location Drawing indicates it is Rangeland. Thanks.

Actually the first reviewer asked that we change it from Range Land to Dry Land prior to the OGLA being rejected. I concur that it is rangeland and thus I sent you the other items. Can you change it from dry land to rangeland? Greatly appreciated!

Kim

Will do. May I also check the Native Grassland box in the Plant Community section or do you think it is more like Disturbed Grassland? If unsure, you can choose both.
