Dirk,

I am seeking a verbal approval to plug the Bledsoe 1-23, which was a washdown. I'm on location with the rig today.

You don't have a form 5 because we only finished the completion/test yesterday and determined it was a dry hole; hence I'd like to plug it now.

I'm in hugo to send this email, but am on location mostly, so please text or call 970 590 3944. I talked to Craig this morning.

Thanks.

Ted
