Subject: State Reportable Release

Good Morning,

This email is to serve as notice to a release we had at the following location:

38-0000-5854-4" Pipeline
SESE Section 11 4S 63W

This release was due to internal corrosion on the pipeline. Due to the excavation depth impacted soil can no longer be safely removed. Impacted soil will be left in place and alternative remediation techniques will be pursued.

Subsequent information will be provided in a Form 19.

Feel free to contact me with any questions.

Thanks,

Charles Chase
