CONDITIONS OF APPROVAL, IF ANY:

Approved March 28, 2013

Based on review of data presented, it appears that no further action is necessary at this time at this site. However, should future conditions at the site be discovered of contaminant concentrations in soils exceeding COGCC standards or if groundwater is found to be significantly impacted, COGCC may require that further investigation and/or remediation be conducted.

TECHNICAL INFORMATION PAGE

1. OGCC Operator Number:	10079	API Number:	05-045-11983
2. Name of Operator:	Antero Resources Piceance LLC		OGCC Facility ID # 335055
3. Well/Facility Name:	Castle Springs Federal U Pad	Well/Facility Number:	31B-07-07-91
4. Location (QtrQtr, Sec, Twp, Rng, Meridian):	SENW 7 7S 91W 6th		

This form is to be completed whenever a Sundry Notice is submitted requiring detailed report of work to be performed or completed. This form shall be transmitted within 30 days of work completed as a "subsequent" report and must accompany Form 4, page 1.

5. DESCRIBE PROPOSED OR COMPLETED OPERATIONS

Remediation at the Castle Springs U Pad commenced on February 18, 2013, per the approved remediation plan submitted via Form 27 on January 23, 2013 (# 7524). Because the impacted area was within and below the production tanks, the first phase of remediation involved shutting in the wells on location in order to remove the piping and tanks at the location. After the tanks and piping were removed the impacted soil was excavated with a track hoe and piled on location for later disposal at South Canyon Landfill.

HRL Compliance Solutions was present during the remediation to field screen the soil to ensure excavation continued until the readings were compliant with Table 910-1 Standards. Clean soil was encountered at a 35 ft. depth and the area of the excavation was about the size of the containment structure at the site (approximately 720 sq. ft.). Six confirmation samples were collected on March 7, 2013 to confirm compliance with Table 901-1 Standards. The analytical data was received on March 15, 2013 and demonstrates compliance with Table 910-1. The area was backfilled soon after the analytical data was received. The analytical data and sample location map are provided as Attachment 1 and Attachment 1A. Photographs of the excavation and the backfilled location are provided as Attachment 2.

Waste transportation and disposal occurred from February 26, 2013 through March 7, 2013. A total of 115 loads of impacted material totaling 1,397 tons was disposed of at South Canyon Landfill. Hard Coy Truck Tickets and waste manifests are included with this submittal as Attachment 3.

Because Antero has excavated the location, properly disposed of the waste material, backfilled the area, and demonstrated site compliance with COGCC Table 910-1 Standards, Antero respectfully requests final COGCC closure of Remediation Project # 7524 in accordance with COGCC Rule 909(e).

Re: **Antero Castle Springs Fed. U Pad Cond Spill 3/7/13**

Work Order: **1303293**

Dear Mark,

ALS Environmental received 9 samples on 11-Mar-2013 10:15 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested.

QC sample results for this data met laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 38.

If you have any questions regarding this report, please feel free to contact me.

Sincerely,

A handwritten signature in cursive script that reads "Ann Preston".
