**Operator Comments:**

Procedure: Lands replaced to their original relative positions and contours. Land tilled adequately to re-establish a proper seedbed. All ground surface disturbing activities at the site have been completed and all disturbed areas have been stabilized. 80% of the vegetative coverage of pre-disturbance levels appears to be in place. Photos have been attached. Date taken, location/well name, GPS coordinates, and a direction of view are all identified on the photos. An overhead photo has also been included from Google Earth to show vegetative growth as of June 2014.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
