Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

While performing construction activities, historical petroleum hydrocarbon impacts were encountered. The volume of the release is unknown. The impacts were determined to be reportable based on the volume of hydrocarbon impacted soils removed from the location. The impacted soils were removed from the site and hauled to the licensed Kerr-McGee Land Treatment Facility for processing. A topographic Site Location Map showing the general location of the release is attached as Figure 1.
