MESSAGE:

Dear Mr. Martin:

This relates to the protection of public health, safety and welfare in the Raton Basin, located in Las Animas County, CO.

The responsible entities should seriously consider pressure grouting the formations around the natural or man made fugitive methane gas seeps, with cement grout until the seeps are sealed, especially in the areas where unregulated Hydraulic Fracturing and Hydrochloric Acid Procedures are being used to accelerate the yield of methane gas.

Much obliged to you.
