OGCC Scan,

Please upload the attached with the following information:

Unique identifier (REM/Spill/NOAV #, etc.): 7037

Document number (leave blank if one needs to be assigned):

Date received: 10/23/2015

Is data entry needed (Y/N): n

Notes: please upload attached document (use filename as document name), please scan this email as, "project communication 10/23/2015"

Thanks!

Subject: Walden Waterflood Facility Remediation #7037

To: "[alex.fischer@state.co.us](mailto:alex.fischer@state.co.us)" <[alex.fischer@state.co.us](mailto:alex.fischer@state.co.us)>, "Neidel - DNR, Kris" <[kris.neidel@state.co.us](mailto:kris.neidel@state.co.us)>

Cc: Peg Young <[PYoung@bonanzacrk.com](mailto:PYoung@bonanzacrk.com)>

Alex/Kris,

I have attached the February and May 2015 groundwater analytical results from the Walden Waterflood Facility (WWFF) site (Remediation #7037). Historically low groundwater table elevations resulted in a localized increase in hydrocarbon concentrations during the August 2015 sampling event.

### **Remediation Status**

Following the successful air sparging/soil vapor extraction pilot test conducted in June 2015, BCEOC and LTE have refined the full scale AS/SVE system design. The full scale implementation will be budgeted for and initiated in Spring 2016. BCEOC will continue to monitor groundwater concentrations on a quarterly basis. This data will be used to finalize the system design prior to construction in Spring 2016.

Please let me know if you have any questions.

Thanks,

Brian
