

Photo 1. View of eastern portion of project area from well pad entrance facing northward. A row of senescing Russian olive (*Eleagnus angustifolia*) trees are present along the eastern edge of the project area.

Photo 2. View of southern portion of project area from well pad entrance facing westward. Russian thistle (*Salsola tragus*) and cheatgrass (*Bromus tectorum*) are growing in the foreground. Revegetation species such as western wheatgrass (*Pascopyrum smithii*) and sagebrush (*Artemisia tridentata*) are growing in the background.

Photo 3. View of western portion of the project area from southwestern corner facing northward. A mix of sparse revegetation species (composition described in previous photos) and weeds are growing within this portion of the project area.
