As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Spill was discovered this morning at 9:00AM MTN by a Foundation Energy pumper. Once discovered, the wells and flowline were shut-in. The vacuum truck picked up around 30 bbls of produced water. The spill is located 320 ft NE of the Hilltop #32-5 and contained on the lease road. The spill did not get into any waters of the state. The pumper said the line pressure was at 60 PSI. The cause of the leak looked to be a piece of pipe that had been crimped. A roustabout crew has fixed the line.
