Engineer	Adding shallower perforations in a currently completed formation; changing gross interval (status of APD is not a factor). This well was reportedly fully cemented behind the production casing (no CBL or cement tickets required at the time of drilling, calculated top at surface). See Form 5 #1965663. No additional isolation concerns for new completion perforations.	10/27/2015 2:09:47 PM
