Andrea,
COGCC is in the process of reviewing the Form 2A for Maury O 13-3 tank, doc no 400903412. Based on the location of this facility and that it was pre-existing, I assigned it a Location ID and with your concurrence would like to change it to an Amended Location.

I understand the related wells are going to become horizontal, so are cuttings going to be stored on this location or at the well location? All of the waste information has been completed on the 2A, so I wanted to double check. If there will not be any waste stored at the site, I would like to remove the disposal information with your concurrence.

Based on the cultural distances section, the nearest facility is 19 feet from the property line, yet there is a comment that all equipment will be 30 feet from the property line. With your concurrence, I will change the nearest facility to 30 feet from the property line.

The Hydrology map and the Form 2A water resources section do not match. With your concurrence, I will update the Form 2A to match the distances listed on the Hydrology map.

Please let me know if you have any questions.

Thank you,
Rebecca

Rebecca –

Noble concurs with your updates to this Form 2A. I apologize for the delayed response – Noble Denver closes at 11:00 on Fridays.

Thank you...Sherri

Thanks Sherri,
Will there be cuttings at the location or are they going to be on the well site?

Thank you,
Rebecca

Rebecca –

After confirming with Greeley, the cuttings will be managed at the drill rig at the wellhead.

Thanks! Sherri
