Arthur Jones A 3
eform 2
Doc 400908065

The shallow resistivity log found in the adjacent BP Arthur Jones A 1 (API 067-07014) indicates a potential fresh water aquifer at a depth of 640'. Because of this the surface casing will be deepened to 690'.

Please advise your drilling department.

Mark Weems, P. E.
Regional Engineer - SW Colorado
