*As defined in COGCC 100-Series Rules*

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

While in the process of removing a partially buried vessel, historical impacted soil was discovered. All impacted soil was removed and confirmation samples were collected from four walls and the base of the excavation. Two of the confirmation samples, one from the base and one from the west wall of the excavation, are still over the COGCC Table 9101-1 Concentration Levels for total petroleum hydrocarbons and benzene. All removed soil was stockpiled within a containment berm onsite. Once all equipment and staff are in place, we will continue to excavate impacted soil.
