## SPILL/RELEASE REPORT (SUPPLEMENTAL)

This form is to be submitted by the party responsible for the oil and gas spill or release. Any spill or release which may impact waters of the State must be reported as soon as practicable; any spill over 20 bbls must be reported within 24 hours and all spills over five bbls must be reported within ten days. Submit a Site Investigation and Remediation Workplan (Form 27) when requested by the Director.

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

At approximately 1:00PM on Wednesday (August 19, 2015) an Oxy contract hydrovac operator spilled approximately 10 barrels of produced water and tank bottom sludge outside of secondary containment during hydrovac unloading operations. During unloading activities, the back gate of the hydrovac truck lost hydraulic pressure and unexpectedly opened. The spilled material flushed out of the hydrovac truck, exited the lined secondary containment, and flowed down the fill slope off the pad and into a small stormwater diversion ditch and stormwater sediment pond. Oxy personnel and contractors immediately contained the running water within the ditch downgradient of the impacted area and began removing the liquid. Another onsite contractor immediately diverted the flowing water upgradient of the impacted area to aid in isolating and capturing all impacted soil and surface water. Impacted soil and water was removed and reintroduced into the secondary containment for disposal.

Impacted Media (Check all that apply) ☒ Soil ☐ Groundwater ☒ Surface Water ☐ Dry Drainage Feature

Surface Area Impacted: Length of Impact (feet): 30 Width of Impact (feet): 20

Depth of Impact (feet BGS): 0 Depth of Impact (inches BGS):           

How was extent determined?

Extent of contamination was determined visually and screened using a PID. Immediately after the spill occurred, response personnel began excavating and containing the spill which resulted in a shallow (up to 3" deep) extent of contamination from the spill. Surface water was contained downgradient of the impacted area and removed for offsite disposal.

Soil/Geology Description:

Additional Spill Details Not Provided Above:

All excavated material was contained inside lined secondary containment and hauled to RNI disposal facility for offsite disposal. Confirmation samples were collected from the excavated area by ECOS Environmental and Disaster Restoration. Sampling locations and analytical results for the confirmation samples can be found in the attached sample location map and tabulated laboratory data spreadsheet. All confirmation samples were found to be below COGCC Table 910-1 standards. The excavated area was backfilled with native material, seeded, and incorporated into Oxy's stormwater management plan until successful revegetation of the sideslope is achieved.

## CORRECTIVE ACTIONS

#1	Supplemental Report Date:	08/28/2015
Cause of Spill (Check all that apply)		
<input checked="" type="checkbox"/> Human Error	<input type="checkbox"/> Equipment Failure	<input type="checkbox"/> Historical-Unknown
<input type="checkbox"/> Other (specify) _____		
Describe Incident & Root Cause (include specific equipment and point of failure)		
<div>The point of failure was the airplane wing located on the left side of the rear hatch door. The airplane wings (door lock system) would not move, allowing the door hinge system to malfunction and lose hydraulic control of the rear door. The door unexpectedly opened completely and released the contents of the hydrovac truck all at once.</div>		
Describe measures taken to prevent the problem(s) from reoccurring:		
<div>The equipment was taken out of service to ensure all mechanical issues were fixed with the door hinge system. During unloading activities, all malfunctioning airplane wings will be monitored to ensure proper unloading activities are completed.</div>		
Volume of Soil Excavated (cubic yards): 2		
Disposition of Excavated Soil (attach documentation)		
<input checked="" type="checkbox"/> Offsite Disposal	<input type="checkbox"/> Onsite Treatment	
<input type="checkbox"/> Other (specify) _____		
Volume of Impacted Ground Water Removed (bbls): 0		
Volume of Impacted Surface Water Removed (bbls): 5
