On November 6, 2015 the bradenhead pressure was evaluated on the RMV 12-16 well (05-045-06859), and found to be 200 psi with a fluid level at 124 feet from surface giving a gradient of 0.876 psi/ft. In an effort to alleviate this pressure, WPX Energy Rocky Mountain LLC requests approval to open and vent the bradenhead on this well for a twelve month period at which time the bradenhead will be shut in and evaluated for 24hrs and the results will be reported.
