

Spicer #03-32H

Location ID: 324754

Jackson County, Colorado

Response to Field Inspection Document #673402612

Photographs show that interim reclamation work has started at the location (all photographs taken on 22nd September, 2015). Location is free of trash and other debris and silt fences and wattles have been removed as appropriate. Location was seeded in October 2014 (see letter from Confluence Energy dated 11/6/2015 attached to this Sundry). Due to the altitude at this location revegetation is slow requiring multiple seeding attempts. Location will be reseeded in Spring 2016.
