Notes:

- * Battlement Mesa 26-33B (26N pad) is located in Tier I and has been considered the pioneering well in this sector since it was completed in 2010 (this year was the th year of production monitoring at that well) for the Sector 10 wells.
 - The bottom hole lat/long according to the gyroscopic survey completed by Noble after drilling is 39.406774, -107.962274 (estimated to be 3,938 feet from the blast site).
- * Battlement Mesa 26-33C (26N pad) is located in Tier I and has been considered the pioneering well in this sector since 2009 (this year was the th year of production monitoring at that well) for the Sector 9 wells.
 - The bottom hole lat/long according to the gyroscopic survey completed by Noble after drilling is 39.405864, -107.962249 (estimated to be 3,904 feet from the blast site).
