COMMENTS:

On June 23, 2015, a gas sample was collected from the Battlement Mesa 26-33C well and submitted for laboratory analysis of tritium. Laboratory results indicated that the sample was above the Sampling and Analysis Plan (SAP) screening level for tritium in gas, but below the SAP action level. In order to verify this result, another sample was collected from this well the week of October 19, 2015. We do not anticipate results to be reported for this sampling event until late December 2015. In order to give us time to accurately review all of the data presented, Caerus requests that the COGCC approve an extension for the second quarter 2015 monitoring report until February 29, 2016. Stan Spencer of the COGCC approved the extension via electronic mail and requested that we formally request this extension through a Form 4. The email with his approval is attached to this form.

Casing Type	Size	Of	/	Hole	Size	Of	/	Casing	Wt/Ft	Csg/LinTop	Setting Depth	Sacks of Cement	Cement Bottom	Cement Top

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

--

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
