Helen,

I have identified pit facility id 116724 as a historical pit that was associated with this location. I have updated our database and pit location.

Can you provide the following information:

Was pit bottom sample taken from the area in the pit (from figure 2) that appears silty and void of vegetation?

Could you identify the blowdown source of the pit and plot on map (or picture)?

It appears that the pit is still open and awaiting closure approval. If this is the case, please specifically request closure of pit facility 116724.

The cleanest way to submit this would be to revise the Form 27 (so the requested information is in one document) and submit on a sundry.

Feel free to contact me with any questions. Thanks.
