Based on review of information presented it appears that no further action is necessary at this time with respect to Project 4212 at the Bunyan tank battery site. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, further investigation and/or remediation activities may be required at the site.

Good Afternoon Mr. Gintautas –

On May 21, 2015, PDC Energy submitted the attached Form 27 Supplement Letter and NFA request for the **Bunyan 1** location (Rem# 4212). The request was initially submitted to Mr. Canfield, however the site is currently assigned to your area.

It appears that the NFA request has not yet been processed or approved. Consequently, if you could please review attached NFA request it would be great appreciated.

Thank you,

Christine Wasko
