Mr. Allison,

Due to Mr. Monahan's current physical condition and inability to actively address the compliance issues listed on Colorado Oil and Gas Conservation Commission (COGCC) inspection document number #679700051 I would like to suggest a tentative timeline of remedial activities based upon a ninety day compliance extension date of March 5, 2016.

1. January 31, 2016:

- Excavate impacted soil around separator and collect confirmation soil samples.
- Improve capacity of AST soil secondary containment berm
- Update facility signage
- Label AST per COGCC Rule 210

2. March 5, 2016:

- Evaluate thief hatch & clean up AST
- Control overgrown weeds onsite
- Remove unused equipment

Sincerely,
