Check if impacted or threatened by spill/Release (please answer Yes/No to all that apply):

Waters of the State ☒ Residence/Occupied Structure ☐ Livestock ☐ Public Byway ☐ Surface Water Supply Area ☐

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

During swabbing activities, a flow line release was discovered adjacent to the separator at the UPRR 42 Pan Am X #1 production facility. Groundwater was encountered during excavation activities at approximately 4 feet below ground surface (bgs). A groundwater sample (GW01) was collected and submitted to Origins Laboratory in Denver, Colorado for analysis of benzene, toluene, ethylbenzene, and total xylenes (BTEX). Analytical results returned on October 2, 2014 indicated that benzene concentrations in the groundwater sample were above applicable COGCC Table 910-1 standards, causing this release to be reportable. The original Initial Spill Report was submitted on October 3, 2014; however, due to an error in the API number, the form was withdrawn and resubmitted on October 10, 2014, per Bob Chesson and Chris Canfield.
