Would you be able to check and see when we might expect the Buffalo 35C-15HZ (400939157) Form 4 might be approved? We have some sort of remediation going on and before we can ask for the variance we need the Rangeland Sundry approved .

Cheryl,
Please explain what type of reclamation is going to occur at this time? Please provide a reference area location that is outside of the disturbed area and either add a BMP stating that reference area photos during the growing season will be provided or I can add a COA.

Thanks,
Rebecca

At this time no reclamation is going to occur. The pictures that were provided with the Form 4 were taken outside of the disturbed area. You cannot see the disturbed area as it is behind the hay bales shown in the picture.

Go ahead and add the COA that new pictures will be provided once the growing season returns.

Cheryl,
The reference area map has the reference area within the disturbed area. Please provide a location that is outside the disturbed area.

Thank you,
Rebecca
