SITE INVESTIGATION AND REMEDIATION WORKPLAN

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. Form 27 is intended to be used whenever possible. Additional documentation will be required when large volumes of soil and groundwater have been impacted or involve large facilities with multiple source areas. See Rule 910. Attach as many pages as needed to fully describe the proposed work.

CAUSE OF CONDITION BEING INVESTIGATED AND REMEDIATED

☐ Spill or Release ☐ Plug & Abandon ☐ Central Facility Closure ☐ Site/Facility Closure ☒ Other (describe): skim pit closure

OGCC Operator Number: 31257

Name of Operator: Fritzler Resources, Inc

Address: P.O. Box 114

City: Fort Morgan State: CO Zip: 80701

Contact Name and Telephone:

Gene Fritzler, VP

No: 970-768-0845. (970-867-1268 24/7)

Fax: 866-437-4804

API Number: 05-121-05180

County: Washington

Facility Name: Scott Federal

Facility Number: 101961 No current pit permit

Well Name: Scott Federal

Well Number: 1

Location: (QtrQtr, Sec, Twp, Rng, Meridian): SWNE 7 4S 53W 6 Latitude: 39.71928 Longitude: -103.356258

TECHNICAL CONDITIONS

Type of Waste Causing Impact (crude oil, condensate, produced water, etc): Produced Water

Site Conditions: Is location within a sensitive area (according to Rule 901e)? ☐ Y ☒ N If yes, attach evaluation.

Adjacent land use (cultivated, irrigated, dry land farming, industrial, residential, etc.): range

Soil type, if not previously identified on Form 2A or Federal Surface Use Plan: Sandy Loamy

Potential receptors (water wells within 1/4 mi, surface waters, etc.): n/a

Description of Impact (if previously provided, refer to that form or document):

Impacted Media (check):

☒ Soils☐ Vegetation☐ Groundwater☐ Surface Water

Extent of Impact:

TBD

How Determined:

Analysis to be performed: TPH(gasoline)

TPH(diesel), BTEX, SARS, EC, pH

REMEDATION WORKPLAN

Describe initial action taken (if previously provided, refer to that form or document):

Skim pit was decommissioned Closure of skim pit is in process.

Describe how source is to be removed:

Sides and bottom pit have been excavated and soils have been composted on site. Manure is being blended and mixed. Soils will be turned and oxygenated

Describe how remediation of existing impacts is to be accomplished, including removal and disposal at an injection well or licensed facility, land treatment on site, removal of impacted groundwater, insitu bioremediation, burning of oily vegetation, etc.:

E&P waste and soils removed from pit are being remediated on site within existing site limits. Highly refractory soils will be hauled to Buffalo Ridge of another acceptable waste facility. Remaining waste will be landfarmed onsite using manure, and urea.

Tracking Number: 2086990
Name of Operator: Fritzler Resources, Inc.
OGCC Operator No: 31257
Received Date: 7/30/2015
Well Name & No: Scott Federal 1
Facility Name & No: No current pit permit

OGCC Employee: Robert Young

If groundwater has been impacted, describe proposed monitoring plan (# of wells or sample points, sampling schedule, analytical methods, etc.):
N/A

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing. Use additional sheet for description if required.

Reclamation of Pit will require excavation, soil analysis, backfill, and compact on.

The site investigation incorporates excavation and sampling. Excavation of E & P waste from the Pit will be completed upon receipt of acceptable analytical results. The confirmation samples to be taken include a composite sample for each side and the bottom(a total of 5 samples) . Each sample will be analysed for the analytes previously listed.

Attach samples and analytical results taken to verify remediation of impacts. Show locations of samples on an onsite schematic or drawing.

Is further site investigation required? ☐ Y ☐ N If yes, describe:

TBD

Final disposition of E&P waste (landtreated and disposed onsite, name of licensed disposal facility, recycling, reuse, etc.):

Either.

Buffalo Ridge or nearest acceptable landfill
and/or
Landtreated onsite.

IMPLEMENTATION SCHEDULE

Date Site Investigation Began: Aug. 2013 Date Site Investigation Completed: Date Remediation Plan Submitted: July 30, 2015
Remediation Start Date: June 2015 Anticipated Completion Date: Aug 2017 Actual Completion Date:

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
