SITE INVESTIGATION AND REMEDIATION WORKPLAN

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. Form 27 is intended to be used whenever possible. Additional documentation will be required when large volumes of soil and groundwater have been impacted or involve large facilities with multiple source areas. See Rule 910. Attach as many pages as needed to fully describe the proposed work.

CAUSE OF CONDITION BEING INVESTIGATED AND REMEDIATED

☐ Spill or Release ☐ Plug & Abandon ☐ Central Facility Closure ☐ Site/Facility Closure ☒ Other (describe): Skim Pit replacement

OGCC Operator Number: 31257	Contact Name and Telephone: Gene Fritzler
Name of Operator: Fritzler Resources, Inc.	No: 970-768-0845 (970-867-9388)
Address: P.O. Box 114	Fax: 866-437-4804(970-867-1268 24/7)
City: Fort Morgan, State: CO Zip: 80701	
API Number: 05-121-8645 (08645)	County: Washington
Facility Name: Jolly Skim Pit	Facility Number: 107652
Well Name: Jolly	Well Number: 1
Location: (QtrQtr, Sec, Twp, Rng, Meridian): Sec 18 3S 55W	Latitude: 39.796047 Longitude: -103.576759

TECHNICAL CONDITIONS

Type of Waste Causing Impact (crude oil, condensate, produced water, etc): Produced Water/oil

Site Conditions: Is location within a sensitive area (according to Rule 901e)? ☐ Y ☒ N If yes, attach evaluation.

Adjacent land use (cultivated, irrigated, dry land farming, industrial, residential, etc.): Range / Pasture

Soil type, if not previously identified on Form 2A or Federal Surface Use Plan: Sandy clay loam

Potential receptors (water wells within 1/4 mi, surface waters, etc.): N/A

Description of Impact (if previously provided, refer to that form or document):

Impacted Media (check):	Extent of Impact:	How Determined:
<input checked="" type="checkbox"/> Soils	TBD during excavation	Analysis to be performed: TPH (gasoline)
<input type="checkbox"/> Vegetation		TPH(Diesel), BTEX,SARS, EC, pH,
<input type="checkbox"/> Groundwater		
<input type="checkbox"/> Surface Water		

REMEDIATION WORKPLAN

Describe initial action taken (if previously provided, refer to that form or document):
Skim pit has been removed from service.

Describe how source is to be removed:
Sides and bottoms of Pit will be excavated.

Describe how remediation of existing impacts is to be accomplished, including removal and disposal at an injection well or licensed facility, land treatment on site, removal of impacted groundwater, insitu bioremediation, burning of oily vegetation, etc.:
E & P waste and soils removed from pit will be remediated on site within existing batt ery boundaries. Highly refractory soils may be hauled to Buffalo Ridge or another ac ceptable waste facility. Waste will be windrowed or composted with manure and/or u rea.

REMEDIAL WORKPLAN (Cont.)

Tracking Number: 2086992
Name of Operator: Fritzler Resources, Inc.
OGCC Operator No: 31257
Received Date: 7/30/2015
Well Name & No: Chas Jolly 1
Facility Name & No: Jolly oil skim pit (107652)

OGCC Employee: Robert Young

If groundwater has been impacted, describe proposed monitoring plan (# of wells or sample points, sampling schedule, analytical methods, etc.):

N/A

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing. Use additional sheet for description if required.

Reclamation of Pit will require excavation, soil analysis, backfill, and compaction. the amount of backfill will be contingent on quantity of soils sent to the disposal facility.

The site investigation incorporates excavation and sampling. Excavation of E & P waste from the Pit will be completed upon receipt of acceptable analytical results. A TPH test kit will be used prior to sending confirmation samples in for analysis. Composite samples from each side and the bottom, (5 total) will be evaluated for the constituents previously discussed.

Attach samples and analytical results taken to verify remediation of impacts. Show locations of samples on an onsite schematic or drawing.

Is further site investigation required? ☐ Y ☐ N If yes, describe:

TBD

Final disposition of E&P waste (landtreated and disposed onsite, name of licensed disposal facility, recycling, reuse, etc.):

Either.

Buffalo Ridge or nearest acceptable landfill
and / or
Onsite remediation.

IMPLEMENTATION SCHEDULE

Date Site Investigation Began: Aug 15, 2015 Date Site Investigation Completed: Date Remediation Plan Submitted: July 2015
Remediation Start Date: Sept, 2015 Anticipated Completion Date: Aug 2017 Actual Completion Date:

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
