NFA for HSR-Eppinger 1-1 Tank Battery ~ NENE S1-TS-R66W ~ Adams County ~ Remediation Project #4274

COGCC has reviewed the No Further Action Status Request Letter Report submitted on December 2, 2015 and concurs that no further action is necessary at this time.

However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, further investigation and/or remediation activities may be required at the site.

Please properly abandon monitoring wells in accordance with Colorado Division of Water Resources guidelines for well abandonment and oversee the decommissioning of the SVE/AS system. Note that surface reclamation must meet the COGCC 1004 series rules.

Remediation Project **#4274** has been closed in the COGIS database via Form 27A document **#200438267**. You may retain a copy of this email as verification of No Further Action required.

Thank you,

Jennifer Hussey, for

Chris Canfield, P.G.
