COMMENTS:

This sundry notice is associated with Remediation Project #8926 and is for Alex Fischer. OXY USA WTP LP (Oxy) is providing this sundry notice as a status update for the Pond 13 West remediation and reconstruction project, reference document #2314004. Due to delayed permit approvals, Oxy has postponed liner removal and characterization of the pit until favorable weather conditions allow complete characterization, remediation if required, and reconstruction of the pit to meet Centralized E&P Waste Management Facility (CEPWMF) construction requirements. Outlined below please find an estimated construction schedule for 2016:

May 14 - begin removing the liquid present in the pit;

June 1 - begin removing the solids found at the bottom of the pit;

June 21 - conduct liner inspection to identify any holes in the liner and to aid in the characterization of soil below the pit;

July 1 - begin removing the liner for offsite disposal;

July 5 - assess below liner soil impacts and characterize the pit bottom for COGCC Table 910-1 standards;

July 7 - assuming impacts are identified, begin excavation and removal of impacted soil to meet COGCC requirements;

August 1 - begin reconstruction of the pit to construction plans as a CEPWMF;

August 31 - complete as-built survey of site prior to liner installation;

September 3 - begin installation of liner system;

September 24 - conduct hydrotest for the facility;

September 28 - begin operation of the facility as a CEPWMF.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____
