Operator Comments:

This sundry is being submitted to change the cementing/ casing design of this well to a monobore. An oil-based system will additionally be used for the 7 7/8" hole. A sundry for the Breniman location (ID# 439436) has been submitted for the WMP to reflect this shift from a purely water based system. An offsite commercial disposal plan is already in place.

Our cementing/ casing plan does provide coverage for the Upper Pierre Aquifer as the long string of this well will be cased to surface and cemented up into the surface casing.

The PWP of this well is the same as the originally permitted well.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
