Wildlife BMPs:

BMP Type	Comment
General Housekeeping	Housekeeping will consist of neat and orderly storage of materials and fluids. Wastes will be temporarily stored in sealed containers and regularly collected and disposed of at offsite, suitable facilities. If spills occur prompt cleanup is required to minimize any commingling of waste materials with stormwater runoff. Routine maintenance will be limited to fueling and lubrication of equipment. Drip pans will be used during routine fueling and maintenance to contain spills or leaks. Any waste product from maintenance will be containerized and transported offsite for disposal or recycling. There will be no major equipment overhauls conducted onsite. Equipment will be transported offsite for major overhauls. Cleanup of trash and discarded materials will be conducted at the end of each work day. Cleanup will consist of patrolling the roadway, access areas, and other work areas to pickup trash, scrap debris, other discarded materials, and any contaminated soil. These materials will be disposed of properly.
Material Handling and Spill Prevention	Spill prevention Control and Countermeasures (SPCC) plans are in place to address any possible spill associated with Oil & Gas operations throughout the state of Colorado in accordance with CFR 112.
Storm Water/Erosion Control	STORM WATER/EROSION CONTROL: Stormwater management plans (SWMP) are in place to address construction, drilling and operations associated with Oil & Gas development throughout the state of Colorado in accordance with Colorado Department of Public Health and Environment (CDPHE) General Permit No. COR-038637. BMP's will be constructed around the perimeter of the site prior to, or at the beginning of construction. BMP's used will vary according to the location, and will remain in place until the pad reaches final reclamation.

COGCC Comments

Comment	User	Date
Permanent stormwater BMPs need to be installed by corrective action date of 1/15/2016. Refer to attached photos in Doc.#682400234.	binschusc	01/07/2016
Surface roughening was installed; however, surface roughening is a temporary stormwater BMP. Additional stormwater BMPs need to be installed in conjunction with surface roughening by the end of business on 1/15/2016. Refer to attached photos in Doc.#682400234.	binschusc	01/07/2016
While using surface roughening as a temporary stormwater BMP, BMPs should be maintained. Do not drive over or fill in surface roughening BMPs with sediment as this diminishes the proper function of the BMP. Until permanent stormwater BMPs are in place, temporary stormwater BMPs need to be maintained in the interim.	binschusc	01/07/2016
