Operator Comments:

The purpose of this sundry is to add 2 MLVTs to the location (No other equipment counts have changed from originally permitted) and revise the access road. The access must be revised due to the powerlines to the south of the location (please refer to location drawing). They are federal powerlines and the government will not let us build a permanent access road passing underneath them in the original proposed location as they are too low in that specific area. PDC proposes utilizing an existing oil and gas operations access road just to the east of the original proposal. In addition, we would like to wrap the access road around the production facility to allow for greater accessibility.

The total disturbed area of the location and total size of the location after reclamation will increase to 8.6 acres and 3.7 acres, respectively. These changes do not move any wellheads or facilities any closer to any cultural items. The surface owner and surround BU owners have been notified of these changes and no objections were received.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
