Operations was performing maintenance to ensure there were no issues on the 4" combined liquids line between PCU 35-11 and Love 8 E&P pond by flowing back to the pond in an effort to identify operational issues from the PCU Secondary shut in. The operator returned shortly afterward and discovered the hose running into the pond had rotated out of the pond releasing ~8.3 bbls of produced water onto the surface of the Pond bank and down the access road bar ditch ~50 feet.
