Re: Emergency Access –J25W 793 pit & A15 pit.

Mr. Pruitt;

This letter is to clarify the access to the J25W 793 pit & A15 pit areas. We do have the necessary equipment needed to access this property and around all pond. The 25 foot wide road is assessable by our brush units and the 10 to 12 feet is ok for a buffer zone. This project is within our response district and I am very knowledge about the project area. All of our brush units, tenders and one structure type engine are all four wheel drive or all wheel drive. I also have the site plan and I do not have any objections with this project. The J25W 793 pit & A15 pit area is protected on the two sides with high vertical dirt areas there is no need for a buffer zone at these points. Our Fire District is complemented with all necessary equipment for this location as well as certified personnel to handle the incident if/when it arises. If you should have any further questions please feel free to contact me at the number in the letterhead. It was nice working with you this morning about this project and look forward to working together on future projects.

Sincerely,

Rob Ferguson
Deputy Fire Chief – Operations
GVFPD

Mission Statement

We, the members of the Grand Valley Fire Protection District, dedicate our efforts to the protection of the lives, property and environment of the citizens of, and visitors to the Grand Valley Fire Protection District
