Denver, Colorado 80202

**RE: Form 4 (Interim Reclamation Completion Notice)
Lambrecht 17-2 (Location: 428886)
Kerr McGee Oil & Gas Onshore LP (Operator: 47120)**

Dear Mr. Schwarz:

Apex Companies, LLC (Apex) is pleased to present this letter to Anadarko Petroleum Corporation (Anadarko) and Kerr McGee Oil & Gas Onshore LP documenting the results of a vegetation assessment that demonstrates successful completion of interim reclamation efforts on the Lambrecht 17-2 (428886) location in Weld County, Colorado.

Based on communications with Anadarko personnel and subsequent site visits, Apex inspectors confirmed that the unused portions of the reduced production footprint have been stabilized and seeded with Anadarko Dryland Pasture Mix. This seed mixture consists of Tetraploid Perennial Ryegrass (19.68%), Smooth Brome, Lincoln (18.66%), Intermediate Wheatgrass, Oahe (14.76%), Dahurian Wildrye (14.44%), Orchardgrass, Paiute (14.29%), and Pubescent Wheatgrass Luna (13.35%).

On July 9, 2015, modified step-point vegetation surveys were conducted on the reclaimed portion of the well pad, and on adjacent undisturbed reference areas. Foliar and basal cover, along with non-vegetated, and noxious weed occurrences were documented; 100 survey points were recorded within the reclaimed disturbance and 100 survey points were recorded within the undisturbed reference area. All noxious weeds as defined by the Colorado Department of Agriculture were excluded from the vegetative coverage calculation.

Survey results indicate the reclaimed area has a foliar vegetative cover that is 86.57% of the undisturbed reference area. Vegetation survey results are provided in the attached vegetation survey summary tables and data sheets. Based on the results of the survey, interim reclamation as defined by COGCC rule 1003.e (2) has been achieved. Photographs required by Rule 1003.e (3) are also attached.

Apex appreciates the opportunity to provide environmental consulting services to Anadarko with this project. Should you have any questions or require additional information, please don't hesitate to contact me.

Sincerely,
Apex Companies, LLC

Vegetation Survey (Summary of Field Data)

Client	Kerr McGee Oil & Gas Onshore LLC
COGCC Location Name (ID)	Lambrecht 17-2 (428886)
Assessment Date	7/9/2015
Inspector Name - Title	Zac Tuthill- Environmental Specialist
Data Processor Name - Title	Tyler Dooley- Environmental Specialist

Based on the survey methodology, the Foliar Cover % in each survey area is calculated by summing the total number of foliar occurrences, minus noxious weeds, and dividing by the total occurrences in the transect. For this location:

Reclaim Area (Foliar Cover)	Reference Area (Foliar Cover)
$(30 + 43 + 0) / 175 =$ 41.71%	$(93 + 0 + 0) / 193 =$ 48.19%

The Percent of Reference (%) used to evaluate each reclaim area for compliance with COGCC Rule 1003.e(2) for determining interim reclamation success, is calculated by dividing the Foliar Cover % in the Reclaim Area by the Foliar Cover % in the Reference Area. For this location:

Percent of Reference (Reclaim % / Reference %)
$41.71\% / 48.19\% =$ 86.57%

Reclaim Area Vegetation

Foliar Cover	41.71%
Basal Cover	41.14%
