### **Best Management Practices**

<b><u>No BMP/COA Type</u></b>		<b><u>Description</u></b>
5	Noise mitigation	If necessary, sound walls and/or hay bales will be used during drilling and completion operations. An ambient sound study will be performed before any operations take place and continuous monitoring will be installed for the duration of the drilling and completions. This information will be used to determine if sound walls/hay bales need to be up before drilling/completing wells start. The monitors will be checked during operations, and if necessary, additional sound walls/hay bales will be installed immediately.
5	Noise mitigation	For this location, temporary sound walls will be installed along the west side and a portion of the north side. Hay bales will be utilized around the remainder of the location.

**Operator Comments:**

The existing BMP "The drill site will be powered by electricity, mitigating the majority of noise from drilling operations. Sound walls and/or hay bales will be used to surround the well site during drilling operations" is not applicable to this well pad.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
