COMMENTS:

-We TD'd surface hole at 1500' with 17.5" hole. When making wiper trip we tagged up inside conductor. We made multiple wiper trips and reamer runs through the trouble area without issues. Have tried to run 13-3/8" casing 3 times with no success. Made milling and reaming runs between each attempt. Casing will not go beyond 135'. We think casing is hanging up in parted conductor. Since we cannot get our surface casing down we would like to plug and skid the rig to re-drill the hole.

- We request to increase the number of wells on the location from 1 to 2.

- Well Name and Number of plugged lost hole: Gregory #5-09H

- Well Name and Number of replacement well: Form 2 has not been submitted at this time.

- No new additional surface disturbance will be made when adding the replacement well.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____
