COGCC Comments

| Comment | User | Date |
|---|------------|------------|
| Reclamation in process, however portions of the interim area contains sparse vegetation and/or exposed soil, and may require additional decompaction, seeding and stabilization to pass reclamation. Refer to photos in attached document. It is the inspectors opinion that the location "as is" would not pass interim reclamation, however, as crops within both the disturbed and reference area have been harvested, a vegetation transect will be conducted in a future growing season to evaluate compliance with reclamation standards. | trujilloam | 01/27/2016 |
| Operator response to this inspection should be provided to the COGCC in the comments section of a Form 4 Sundry notice. | trujilloam | 01/27/2016 |
| Subsidence occuring along pipeline north from this location, to well 095-06399 | trujilloam | 01/27/2016 |
