

**PDC Energy, Inc.**  
**Third Quarter 2014 Groundwater Monitoring Summary**

October 22, 2014

Cottonwood #1 Tank Battery  
NESE Section 13 T6N R66W  
Weld County, API # 05-123-11801

This groundwater summary has been prepared by Tasman Geosciences, LLC for the Cottonwood #1 tank battery. On September 24, 2014 groundwater sampling was conducted at seven monitoring well locations. Groundwater samples were submitted for laboratory analysis of benzene, toluene, ethylbenzene, and total xylenes (BTEX) by USEPA Method 8260B. Analytical results are summarized in Table 1 below and the laboratory report is included as Attachment A. Sample locations and corresponding analytical results are illustrated on Figure 1. Third quarter analytical results indicate that benzene concentrations are above COGCC regulatory standards in monitoring wells BH02 and BH03. BTEX concentrations are below regulatory standards in the remaining five sample locations.

Tasman continued enhanced fluid recovery (EFR) and air sparge (AS) events at the site during the third quarter 2014. A summary of the EFR/AS operational data is provided in Table 2. EFR/AS activities will continue through the fourth quarter 2014.

Fourth quarter 2014 groundwater sampling will be conducted during December 2014.

**TABLE 1**

<b>COGCC standards for groundwater (ug/L) <sup>(1)</sup></b>		<b>5</b>	<b>560</b>	<b>700</b>	<b>1,400</b>	

Notes:

1). The environmental cleanup standards for groundwater that are applicable to this site are the Colorado Oil and Gas Conservation Commission (COGCC) standards for contaminants in groundwater according to Table 910-1 of the COGCC 900 Series Rule for E&P Waste Management.

**Bold red** values indicate an exceedance of the COGCC groundwater standards for the site.

ug/L-Micrograms per liter

NM - Not Measured
