Jan,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comment.

In the Construction section you have indicated the size of the disturbed area during construction and after interim reclamation will be 19.3 acres. This seems excessive given the number of production facilities listed in the Facilities section. To better understand the large area of disturbed ground proposed, please provide a scaled Facility Layout Drawing that depicts the production facilities listed on the Form 2A.

Please respond to this correspondence by February 14, 2016. If you have any questions, please contact me. Thank you.

Doug,

Attached is the information that Noble supplied to the BLM in their Master Development Plan. I hope this will answer your concerns.

Please let me know if you need anything else.

Thanks
Jan
