COMMENTS:

Wellwork plans to repair a suspected casing leak. Plan to pull production equipment, isolate the casing leak and cement squeeze leak and run new production equipment and return the well to production. In the event that the casing leak proves to be extensively throughout the whole string, Chevron will elect to P&A the wellbore. A cement bond log dated 8/23/1971 is attached to this document. A proposed P&A procedure is attached to this document.
