September 8, 1978

Gentlemen:

Regarding the subject pit permit, this well is shut in waiting on a gas line connection. It has not produced since the initial testing, and as a result we do not have a representative sample of produced water for analysis and submittal. When the well is placed on production, we will submit the required water analysis and permit application.

If any further action is required by us at this time, please notify us.

Yours truly,

W. S. Deans,  
Senior Petroleum Engineer

WSD/meh
