SUNDRY NOTICE

Submit a signed original. This form is to be used for general, technical and environmental sundry information. For proposed or completed operations, describe in full in Comments or provide as an attachment. Identify Well by API Number; identify Oil and Gas Location by Location ID Number; identify other Facility by Facility ID Number.

OGCC Operator Number: 10110 Contact Name Ty Woodworth
Name of Operator: GREAT WESTERN OPERATING COMPANY LLC Phone: (970) 274-9254
Address: 1801 BROADWAY #500 Fax: ()
City: DENVER State: CO Zip: 80202 Email: twoodworth@gwogco.com

<u>Objective Formation</u>	<u>Formation Code</u>	<u>Spacing Order Number</u>	<u>Unit Acreage</u>	<u>Unit Configuration</u>

OTHER CHANGES

☐ **REMOVE FROM SURFACE BOND** Signed surface use agreement is a required attachment

☐ **CHANGE OF WELL, FACILITY OR OIL & GAS LOCATION NAME OR NUMBER**

From: Name SCHNEIDER HD Number 11-369HC Effective Date: _____

To: Name _____ Number _____

☐ **ABANDON PERMIT: Permit can only be abandoned if the permitted operation has NOT been conducted. Field inspection will be conducted to verify site status.**

☐ WELL: Abandon Application for Permit-to-Drill (Form2) – Well API Number _____ has not been drilled.

☐ PIT: Abandon Earthen Pit Permit (Form 15) – COGCC Pit Facility ID Number _____ has not been constructed (Permitted and constructed pit requires closure per Rule 905)

☐ CENTRALIZED E&P WASTE MANAGEMENT FACILITY: Abandon Centralized E&P Waste Management Facility Permit (Form 28) – Facility ID Number _____ has not been constructed (Constructed facility requires closure per Rule 908)

OIL & GAS LOCATION ID Number: _____

☐ Abandon Oil & Gas Location Assessment (Form 2A) – Location has not been constructed and site will not be used in the future.

☐ Keep Oil & Gas Location Assessment (Form 2A) active until expiration date. This site will be used in the future.

Surface disturbance from Oil and Gas Operations must be reclaimed per Rule 1003 and Rule 1004.

☐ **REQUEST FOR CONFIDENTIAL STATUS**

☐ **DIGITAL WELL LOG UPLOAD**

☐ **DOCUMENTS SUBMITTED** Purpose of Submission: _____

RECLAMATION**INTERIM RECLAMATION**

☐ Interim Reclamation will commence approximately _____

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

☐ Final Reclamation will commence approximately _____

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

COMMENTS:

Follow up Form 4 sundry for Schneider 11-369HC (05-123-41746) High Bradenhead Pressure Form 42 (Doc# 400985424) submitted 2/8/2016.

On 1/30/16 a WRBP was set at 5523' and the casing was pressure tested to 9500 psi for 30 minutes successfully. The bradenhead pressure on the well was checked on 2/6/16 (prior to stimulation) and it had 650 psi on it. It was then bled down with only gas escaping (no fluid). The bradenhead pressure gradually rose to 380 psi that night. Stimulation began on 2/7/16 via the 'zipper' frac/plug and perf method. Bradenhead pressure continued to gradually rise and hit 575 psi on 2/8/16. The frac job had no effect on the bradenhead pressure value or rate of increase. GWOG contacted Diana Burn at COGCC on 2/8/16 to report the bradenhead pressure. After discussion she asked us to open the bradenhead, leave it open for remainder of the stimulation, and collect an extended isotopic gas analysis on the gas. GWOG also now knows that COGCC would like to be notified of high bradenhead pressure even if it's prior to stimulation.

The gas analysis was collected from the bradenhead on 2/16/16 and sent in to DIG for extended isotope analysis. Stimulation ended today, 2/18/16. The bradenhead is still open. This well will be the first well we drill out and land tubing. Drill out/flowback operations will start on 2/21/16. We will continue to keep the bradenhead open during the drill out/flowback and monitor it for change. Once the well cuts hydrocarbon we will collect a gas sample from the production stream and send it in for extended isotopic analysis to compare to the bradenhead sample.

GWOG does not believe the bradenhead gas is a function of the stimulation of the well. The bradenhead had pressure prior to stimulation and there was no response on the bradenhead when frac'ing. The casing also tested successfully to 9500 psi prior to stimulation. There is also very good cement up to 5390 ft (5-1/2" monobore). Surface casing shoe is at 1494 ft. Cement was actually circulated to surface during the primary job but the bond above 5390 ft is ratty. Right now we believe there is a high likelihood the gas is coming from an uphole source. Once we obtain an extended gas analysis on the production gas we will hopefully be better equipped to identify the source. For the time being we will keep the bradenhead open and monitor it for change.

There are 3 other wells on this pad, one of which also has high bradenhead pressure (05-123-41747), although it is lower. Please see the respective Form 4 for discussion in this well. Out of the other two wells, one has zero bradenhead pressure and the other had 80 psi at one point prior to stimulation but has since dropped to 12 psi as of 2/18/16.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million)

Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
