

Remedial Correction Plan for Savage 8A-794-SWD:

There are no wellbores (producing, P&A, D&A, or otherwise) within 0.25 mile of the proposed injection zone on the Savage 8A-794-SWD (see Savage 8A-794 SWD - Qtr mile O&G Well Radius Map). Future wells are planned to be drilled from the pad but have the following COA to ensure operator provides sufficient cement coverage over the proposed Ohio Creek interval:

(3) Operator shall provide cement coverage from the production casing shoe to a minimum of 200' above all Mesa Verde Group (and Ohio Creek Formation, if present) oil, gas, and water-bearing sandstone and coalbed formations. Verify production casing cement coverage with a cement bond log.
