

Photo 1. View of the project area from the northwestern corner facing center.

Photo 2. View of the northern portion of the project area from the northwestern corner facing eastward. Revegetation is comprised of grasses such as smooth brome (*Bromus inermis*), crested wheatgrass (*Agropyron cristatum*), and intermediate wheatgrass (*Thinopyron intermedium*).

Photo 3. View of the western portion of the project area from the northwestern corner facing southward.

Photo 4. View of the eastern portion of the project area from the northeastern corner facing southward.

Photo 5. View of the southern portion of the project area from the southeastern edge facing westward. Musk thistle debris in the foreground appears to have seeded and will likely need treatment in 2016.
