Comment: Location is in a residential/ranching area with residences nearby and surrounded by irrigated pastures. Revegetation is progressing within the western and southern portions of the interim reclamation area. Poor revegetation in the northern and eastern portions needs to be monitored during the 2016 growing season and seeded in fall 2016 if it isn't progressing.

**COGCC Comments**

Comment	User	Date
Overall this inspection is "Satisfactory". However dead kochia debris needs to be removed by March 31, 2016. Additionally revegetation in the northern and eastern portions of the project area need monitoring and re-seeding in fall 2016 if vegetation cover is not increasing.	RoyC	02/29/2016
