COMMENTS:

This COGCC Form 4 is being submitted in order to permit the re-use of treated E&P material that is currently stored at the GM 11-2 (COGCC Facility #334771, Spill tracking #400952552). The treated E&P material was generated during spill remediation activities. With the COGCC's approval, approximately 40 yards of treated material would be transported to the GM 21-2 well pad and used as a backfill material on another remediation project (COGCC Facility #311584, Remediation #7714). WPX already received the landowner's approval to proceed with the transportation and re-use of the treated E&P waste. The laboratory results for the treated E&P waste are summarized in the attached table. The analytical laboratory reports are included as an attachment.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
